1. Introduction

The Ex-Penlight is a robust yet easy to operate pocket torch, making it ideal for use in confined and restricted spaces within hazardous areas.

2. Safety Information

Safe operation of the equipment is maintained providing that all instructions and warnings contained in this manual are fully observed. In case of doubt (due to translation and/or printing errors) reference should be made to the original German instruction manual.

3. Faults & Damage

If there is any reason to suspect that the safety of the unit has been affected then it must be immediately withdrawn from use and precautionary measures taken in order to prevent any further use of in the hazardous area.

The safety and integrity of the unit could be compromised by, for example:

- *External damage to the housing*
- *Incorrect storage of the equipment*
- *Damage sustained in transit*
- *The correct certification is illegible*

4. Safety Regulations

The use of the intrinsically safe Ex-Penlight meets the requirements of the regulations providing that the user observes and applies the requirements as laid down in the regulations and that improper and incorrect use of the unit is avoided.

- *The device must not be opened within the hazardous area.*
- *Batteries (see page 17) must only be changed outside the hazardous area.*
- *The bulb must only be changed outside the hazardous area.*

5. Data & Specification

Operating temperature	:	-20°C ... +40°C
CE number	:	CE 0102
IP Protection Level	:	IP 54
Certificate of Conformity	:	TÜV 99 ATEX 1512
Certification	:	 II 2 G EEx e ia IIC T4

Authorised for Device group II, Category 2 gas group C potentially explosive gases, vapours or mist, Temperature class T4.

6. Operation

Pressing the plunger switch on the top of the torch switches the light on and off.

7. Replacement of Defective Bulbs & Batteries

Remove the lens head by unscrewing in an anti-clockwise direction.

Remove defective bulb – ensuring that only Philips type 222 is used as replacement.

The use of any other type of bulb is strictly forbidden in that it will invalidate the Ex-data certification. When replacing the batteries please take care to ensure that the positive poles of the batteries point towards the light bulb/lens head. Replace the lens head. Only batteries LR03 according to IEC (see tables) may be replaced. The use of any other type of battery is strictly forbidden in that it will invalidate the EX-data certification.

8. Repairs

The general terms and conditions of ELEX V apply to repair work. The manufacturer must carry out the repair work in order to check for the safe functioning of the protective circuits.

9. Guarantee and Liability

The instrument parts and functions are guaranteed for two years, starting from the date of delivery. This guarantee remains valid if defective components are submitted. We reserve the right to exchange, modify or repair the equipment.

The company ECOM Rolf Nied GmbH is responsible for the granting of the guarantee. It takes no responsibility for damages, expenses or losses resulting from the use or purchase of the equipment. Neither is ECOM liable for damages, expenses or losses arising from any special or subsequent damages.

Further, any use other than that as described in section 1 is not permitted. ECOM is not liable for any damages resulting from any differing or excessive use. The user carries this risk alone.

In those countries where the restriction of a legal guarantee (e.g. the exclusion or limitation of subsequent damage) is not permitted, it could be that the above mentioned limitations and exclusions are not valid for each purchase. Should any clause of this guarantee be found ineffective or unacceptable before a court, then the effectivity or enforcement of any other part of this guarantee should be unaffected by such claims.

10. EC Type-Examination Certificate

EC TYPE-EXAMINATION CERTIFICATE

- (1) Equipment or Protective System intended for use in potentially explosive atmospheres - Directive 94/9/EC

(2) EC-Type Examination Certificate Number

TUV 99 ATEX 1512

- (3) Explosion-proof torch type Ex-Penlight
 ECOM Rofl Need GmbH
 Industriestraße 2
 D-37959 Assamstadt

(4) This equipment or protective system and any acceptable variation thereto is specified in the schedule to this certificate.

(5) The TÜV Hannover/Sachsen-Anhalt e.V. TÜV Certification Body N° 0032 in accordance with Article 9 of the Council Directive of the EC of March 23, 1994 (94/9/EC), certifies that this equipment or protective system has been found to comply with the Basic Health and Safety Requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres given in Annex II to the Directive.

(6) The examination and test results are recorded in the confidential report N° 99/PX28090. Compliance with the Basic Health and Safety Requirements has been assured by compliance with:

EN 50 014:1997 EN 50 019:1994 EN 50 020:1994

(7) If the sign "X" is placed after the certification number, it indicates that the equipment or protective system is subject to special conditions for safe use specified in the schedule to this certificate.

(8) This EC-type examination certificate relates only to the design and construction of the specified equipment or protective system according to Directive 94/9/EC. Further requirements of this Directive apply to the manufacture and placing on the market of this equipment or protective system.

(9) The marking of the equipment or protective system must include the following:

Hannover, 1999-12-23

TÜV Hannover/Sachsen-Anhalt e.V.
 TÜV CERT-Zertifizierungsstelle
 Am TÜV 1
 D-30619 Hannover

G. Kopp
 Head of the
 Certification Body

This certificate may only be reproduced without any change, in whole or in part.
 Exceptions or changes will be shown on the TÜV Approval Certificate (Zertifikat).

SCHEDULE

(14) EC-TYPE EXAMINATION CERTIFICATE N° TÜV 99 ATEX 1512

(15) Description of equipment or protective system

The explosion-proof torch type Ex-Penlight is allowed to be used within the explosion-hazardous area.

Electrical data

Supply 2 pcs. alkaline batteries, size AAA according to IEC LR03 or R03
 (internal battery) U = 3 V

Only batteries successfully type-examined according to Section 10.9 of the EN 50020:1994 are permissible.

The manufacturers and the types have to be indicated in the operating instructions.

Bulbs Incandescent lamps according to DIN 4984-6, page 1, form K, U = 2,25 V, I = 0,25 A, cold resistance R ≥ 0,76 Ω

Only bulbs successfully type-examined according to Section 10.5 and 10.8 of the EN 50020:1994 with the above mentioned cold resistance are admissible. The manufacturers and types have to be indicated in the operating instructions.

The replacement of the batteries and bulbs is only allowed to be replaced outside of the explosion-hazardous area.

(16) Test documents are listed in the test report No. 99/PX28090.

(17) Special condition for safe use

none

(18) Basic Health and Safety Requirements

no additional ones
